**OBÉSITÉ SANTÉ PUBLIQUE ET POPULISME ALIMENTAIRE**  
**FABRICE ETLÉ**

L'obésité n'est pas seulement un enjeu de santé publique. Son développement rapide dans les sociétés occidentales, au-delà même du cadre de production agro-alimentaire, est le résultat d'un processus complexe qui implique des acteurs multiples, des politiques publiques, des comportements individuels et des pratiques agricoles. Ce livre explore les liens entre la santé publique, l'alimentation et le développement durable, et propose un cadre d'analyse et de prévention responsable.

À cette occasion, un atelier pour la construction d'une politique alimentaire cohérente. Fabrice Etlé répond par la négative. C'est bien l'évolution des modes de consommation et de production agricole qui a conduit à l'obésité. Mais cette évolution est le résultat d'un ensemble de pratiques agricoles et de politiques publiques, qui ont conduit à une dégradation des modes agro-alimentaires.

Household Food Consumption, Individual Caloric Intake, and Obesity in France?

Clifford Branson<sup>1</sup> Pierre Dubé<sup>2</sup> Valérie Chanois<sup>3</sup>

First Version, January 2007; This Version, May 2011

## Abstract

We draw here to test a long period of observation of all food purchases at the household level in order to study the quality of average individual caloric intake and obesity prevalence, as well as the role of individual consumption. Using the French Panel on Family Budgets, we analyze the evolution of caloric intake and individual food consumption. The results show that the average individual caloric intake has increased over the period, and that the increase in caloric intake is associated with an increase in obesity prevalence. The results also show that the increase in caloric intake is associated with an increase in individual food consumption.
